WordPress Plugin Directory <plugins@wordpress.org>

2026年5月14日 凌晨2:47

收件者: jerry@museder.com

Congratulations, the plugin hosting request for Museder RestoreOne has been approved.

Within one (1) hour your account (artherslin) will be granted commit access to your Subversion (SVN) repository.

- SVN URL: <https://plugins.svn.wordpress.org/museder-restoreone>
- Public URL: <https://wordpress.org/plugins/museder-restoreone>

Once your account access has been activated, you may upload your code using a SVN client of your choice. If you are new to SVN (or the Plugin Directory) make sure to review all the links in this email.

To answer some common questions:

- You must use SVN to upload your code -- we are unable to do that for you
- Your SVN username is artherslin and is case sensitive.
- You can **set up your SVN credentials** (if you haven't already) in the "Account & Security" section of your [WordPress.org profile](#).
- SVN will not accept your email address as a username
- Due to the size of the directory, it may take 72 hours before all search results are properly updated

To help you get started, here are some links:
